AmeriKiosks

**We dispense smiles,
we dispense solutions...**

Who are We?

- AmeriKiosks is born out of the retailers' need for a company that provides end-to-end solutions transitioning them into the world of automated retail.
- At AmeriKiosks we develop and oversee the operations for retailers and provide the insight needed to grow and thrive in the automated retail industry.
- With many years of experience in the industry, AmeriKiosks is the partner retailers need to guide their transition into the most advanced automated retail company they can become. AmeriKiosks is owned and managed by the Pharmabox team.

Technology

AmeriKiosks's automated systems/kiosks offer:

- An internal system featuring real-time inventory control and the creation of precise daily and monthly reports.
- A modern, innovative, and attractive system that displays any product regardless of its shape, size, or presentation, avoiding the need to repackage.
- The ability to accept discount codes through the purchase screen or built-in barcode reader.
- A system of photosensors capable of monitoring the entire product delivery process - the software processes the charge only when the sensor detects the product has been successfully removed from the delivery tray.
- A large storage capacity allowing for a wide variety of product choices.

Innovation and Technology

Software

Truly Customizable

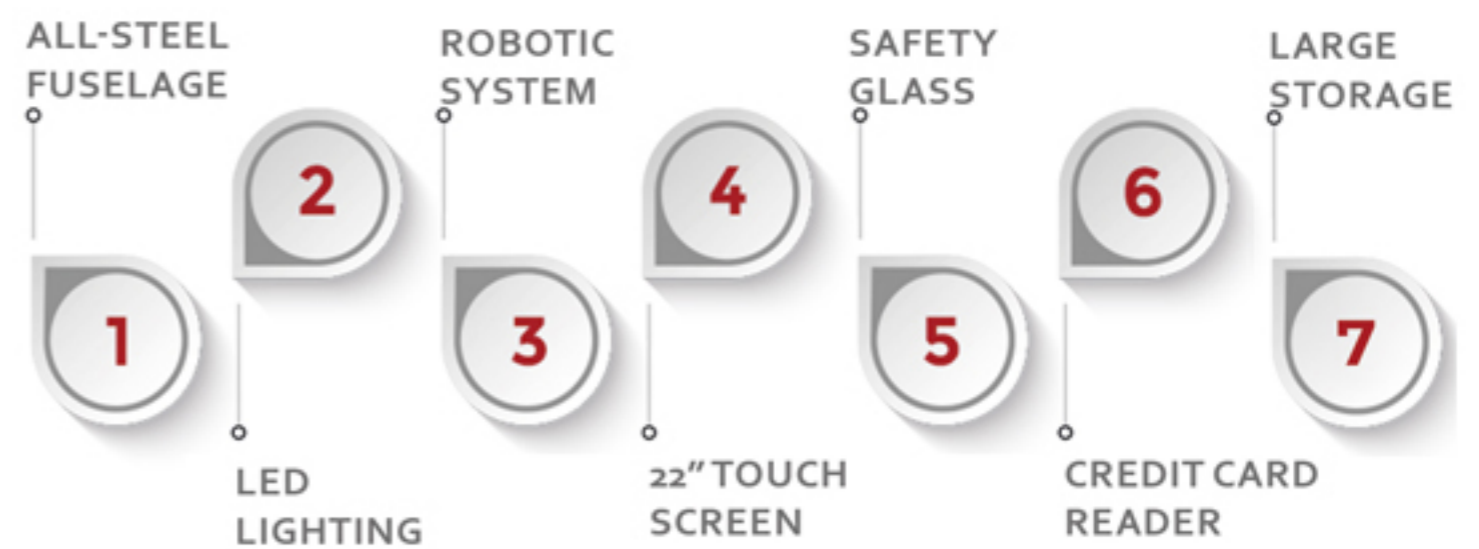

Our user interface extends your impactful branding and tells your story in the way you want it told.

User Friendly

Our user interface designs look dramatic and have simplistic natural ease-of-use allowing your client to quickly find the product they wish to purchase.

Tight Integration

Our software is designed specifically for our automated kiosks giving us the ability to make modifications to the interface without affecting the hardware's functionality.

Problems solved for retailers:

By developing technologies that allow 24/7 service, retailers can benefit from the following:

- Lower their cost of operations.
- Expose their brand and products.
- Get locations where traditional retail is not available.
- Increase sales volume.
- Get a competitive advantage.

In-store benefits

- Better inventory control
- Reduce service time.
- Improve customer experience.
- Reduce inventory loss.

Why choose automated retail?

- Some products are unsuitable for on-shelf availability.

- Shrinkage impact is very high.

- Touch-screen guidance ensures shopper selects the correct product in the absence of in-store expertise.

- Traditional method of locking away products is inefficient for customers and labor intensive for retailer.

Drive -Thru:

Taking convenience to the next level. More than automated retail, we are innovative retail.

Our state-of-the-art products are thoughtfully designed to solve specific pain points, increase customer experience, and drive ROI.

The path to success is an ongoing process that we are determined to continue.

Retail concepts

Brand collaborations

WHO TRUST US:

We've developed a strong business relationship with partners who have added high value to our commercial network.

This partnership combined with our technology and business model makes us unique in the vending machine market.
